Application No PCT/US2004/039066

# A. CLASSIFICATION OF SUBJECT MATTER IPC 7 C12N15/53 C12N9/64

According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) IPC 7 C12N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, BIOSIS, EMBASE, Sequence Search

PCT/US2004/039066

| Box II Observations where                                      | certain claims were found unsearchable (Continuation of item 2 of first sheet)   |
|--|--|
| This International Search Report                               | has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:  |
| 1. Claims Nos.: because they relate to                         | subject matter not required to be searched by this Authority, namely:  |
| _  |  |
| Claims Nos.:     because they relate to an extent that no mean | parts of the International Application that do not comply with the prescribed requirements to such<br>singful International Search can be carried out, specifically:     |
|  |  |
| 3. Claims Nos.: because they are dep                           | endent claims and are not dratted in accordance with the second and third sentences of Rule 6.4(a).  |
|  | re unity of invention is lacking (Continuation of item 3 of first sheet)   |
|  |  |
| This International Searching A                                 | uthority found multiple inventions in this international application, as follows:  |
| see addition   | al sheet   |
|  |  |
| As all required additions                                      | onal search fees were timely paid by the applicant, this International Search Report covers all  |
| searchable claims.   |  |
| 2. As all searchable cla<br>of any additional fee              | ims could be searched without effort justifying an additional fee, this Authority did not invite payment   |
|  |  |
| 3. As only some of the covers only those cl                    | required additional search fees were timely paid by the applicant, this international Search Report<br>aims for which fees were paid, specifically claims Nos.:          |
|  |  |
|  |  |
| 4. V No required addition                                      | nal search fees were timely paid by the applicant. Consequently, this international Search Report is antion first mentioned in the claims, it is covered by claims Nos.: |
| The restricted to the live                                     | , 87-98, 103, 105-107, 109 completely; 48-53, 85, 86 partially   |
| Remark on Protest  | The additional search fees were accompanied by the applicant's protest.  |
|  | No protest accompanied the payment of additional search fees.  |

#### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-47,54-84,87-98,103,105-107,109 completely; 48-53,85,86 partially

An isolated serine protease obtained from a member of the Micrococcinea, in particular from Cellulomonas 6984 according to SEQ ID NO:8, encoding polynucleotides, in particular according to SEQ ID NO:1 and 4, mutants and variants thereof, as well as realted subject-matter as claimed. Said variants being in particular serine proteases from other Cellulomonas species according to SEQ ID NO:53-66.

2. claims: 48-53,85,86 partially

idem for SEQ ID NO:67,68 (Oerskovia turbata)

3. claims: 48-53,85,86 partially

idem for SEQ ID NO:69,70 (Oerskovia jenensis)

4. claims: 48-53,85,86 partially

idem for SEQ ID NO:71,72 (Cellulosimicrobium cellulans)

5. claims: 48-53,85,86 partially

idem for SEQ ID NO:73,74 (Promicromonospora citrea)

6. claims: 48-53,85,86 partially

idem for SEQ ID NO:75,76 (Promicromonospora sukumoe)

7. claims: 48-53,85,86 partially

idem for SEQ ID NO:77,78 (Xylanibacterium ulmi)

8. claims: 99-102,104,108 completely

A cleaning composition that comprises at least one stable enzyme, said cleaning composition comprising a sufficient amount of a pH modifier to provide said composition with a neat pH of from about 3 to about 5, said composition being essentially free of materials that hydrolyze at a pH of from about 3 to about 5, as well as subject-matter related thereto.
